HOUSTON: On Sunday, July 13, Al Saif Youth held their 4th Annual Youth Iftaar for the Muslim youth in Houston.

The event was a huge success with council member Richard Nguyen and Congresswoman Sheila Jackson Lee presenting Shabu (Zeenat) Boghani, Founder and CEO of

Al Saif Youth, with a certification of appreciation. Other important political dignitaries in attendance included Congressman Al Green, Council Member Richard Nguyen, Consul General of Indonesia, Isman Pasha, President of MACC and Event Co-Chair Rahman Moton and Tax Collector, Mike

Sullivan who represented Judge Ed Emmett.

The auspicious event began with beautiful recitations of the Holy Quran followed by English translations making it easier for the youth to understand the words. Following, were the spectacular performances of Hamd, Naats, Salaam and Dua. Despite the hall being filled with a crowd of nearly 500 people there was silence as everyone attentively listened to the religious hymns. A special video of Al Saif Youth volunteers spreading the message that nobody should

be judged based on appearances and that only God can judge was also shown. Lastly, the event also had an Art Competition, showcasing beautiful artwork submitted by the youth.

Al Saif Youth's Shabu (Zeenat) Boghani would like to thank the people behind the success of the event, including countless supporters and her team of volunteers, and all the parents. Without their support this event would not have been successful. In addition, Rahman Moton was appreciated for his help and support.

## Hallmarks of a Successful Education Program

*Best in Class Education Center proves its effectiveness by successfully signing clients as franchisees*

Learning is a dynamic process, and when your children need an added measure of instruction in school, it's important to find them the proper resources to optimize learning and increase confidence in the classroom.

Three Best in Class clients have made the transition from customer to franchisee due to the incredible success their children have seen through the brand's approach to tutoring. Franchisees Jenny Tran in Elk Grove, California; Aruna Sheeba Andrew in Austin, Texas; and Priya Venkat in Allen, Texas partnered with Best in Class in hopes of continuing to see their kids achieve, as well as offering the gift of education to other children in their communities.

These three new business owners invested in Best in Class after seeing firsthand the improvements and achievements their children accomplished. To ensure your children receive quality education services, look for the following characteristics in a tutoring center.

- Each student's needs are different; therefore, adaptable material and active teaching that can be tailored to each individual is crucial. With the kind of hands-on instruction provided at Best in Class, students are more likely to achieve mastery of targeted concepts.
- A diverse and challenging curriculum that promotes critical thinking and is up-

dated consistently is vital for progressive tutoring. At Best in Class, we utilize original, consistently updated educational materials and assessments, allowing teachers to accurately measure progress and mastery of core curricula.

- It is necessary that the tutoring center is a nurturing environment with solid academic and social support in order to build confidence in your child. When your children see their growing accomplishments and feel smart, their sense of self-worth and agency will skyrocket.

The education industry is a growing business, so discerning parents should look for the above characteristics when seeking quality tutoring services. Best in Class prides itself on working with students to build fundamental skills, solve problems, and expand their horizons.

Best in Class is planning to open 20 units in 2014, with capacity for 22 to 28 units in Texas, including markets such as Dallas, Austin, San Antonio, and Houston. The current team behind Best in Class seeks passionate and dedicated individuals to join this premier franchise family and ensure our youth will excel in math and English.
